SecureTablePay

Easy. Efficient. Secure.

Pay-at-the-table Solution

SecureTablePay is an EMV pay-at-the-table solution, for both chip and sign and chip and pin cards. With a decade of field-proven innovation in over 2,000 restaurant installations, SecureTablePay is now fully certified and available in the US marketplace.

The Benefits of SecureTablePay

Secure: People, cards, identities, data: all are more secure with SecureTablePay. Your customers' privacy is protected: their cards never leave their hands so there is no chance of identity theft. Bringing EMV to the table protects the restaurant, reducing chargebacks and potential fraud. It's also safer for you. Since the transaction is processed between the SecureTablePay pinpad and the host processor, the sensitive and at-risk data that demands rigorous levels of PCI compliance never touches your POS.

Efficient: SecureTablePay delivers not just increased security but increased efficiency as well: the perfect combination. When you eliminate steps by completing the payment transaction directly at the table, you reduce time, cost and risk. And that means greater convenience for the customer and greater productivity for the server.

Universal: SecureTablePay works with more than 20 top restaurant management systems. (If you use a system that hasn't been integrated yet, we'll work with you to integrate it quickly and with minimal effort.) And it works with most leading payment processors, ensuring secure and accurate transaction processing.

SecureTablePay Winning Features

- Fully certified for the U.S.

- Accepts credit cards, debit cards, gift cards, loyalty and point cards

- Multichannel ready: Bluetooth for table service, wired and 3G available

- Works with most POS systems and leading payment processors

- EMV chip and sign as well as chip and pin, EMV contactless / tap and go / NFC

- Pinpad pulls the check information remotely from the POS, freeing up the POS workstation

- Pinpads are not paired to a specific POS station therefore any server or pinpad can view and accept payments for any table or check

- Automatic tip calculator with adjustable percentages and/or dollar amounts

- Pinpad closes the table and completes full payment reconciliation remotely so the server does not need to dock the pinpad between transactions
